# The Olympic Technological Evolution

Driven by Atos's innovative solutions throughout the years

# History of the Cyber Attacks of the Olympic Games

## PEKIN 2008

Imitation of ticketing websites to steal customers' bank details.

## LONDRES 2012

The night before the opening ceremony, tactical reconnaissance of the Olympic stadium's power supply was detected.

## RIO 2016

Numerous attenuated DDoS attacks (up to 540Gbps) on official games sites. AMA compromised.

## TOKYO 2020

Data leaks from ticketing portals and volunteers before the games.

## VANCOUVER 2010

Spoofing of the official website(vancouver2010.com)

Search engine optimization to redirect users to fake websites and sell fake tickets.

## SOTCHI 2014

Numerous attacks on local and partner websites.700 Russian websites defaced and 3 websites closely linked to the Games taken offline.

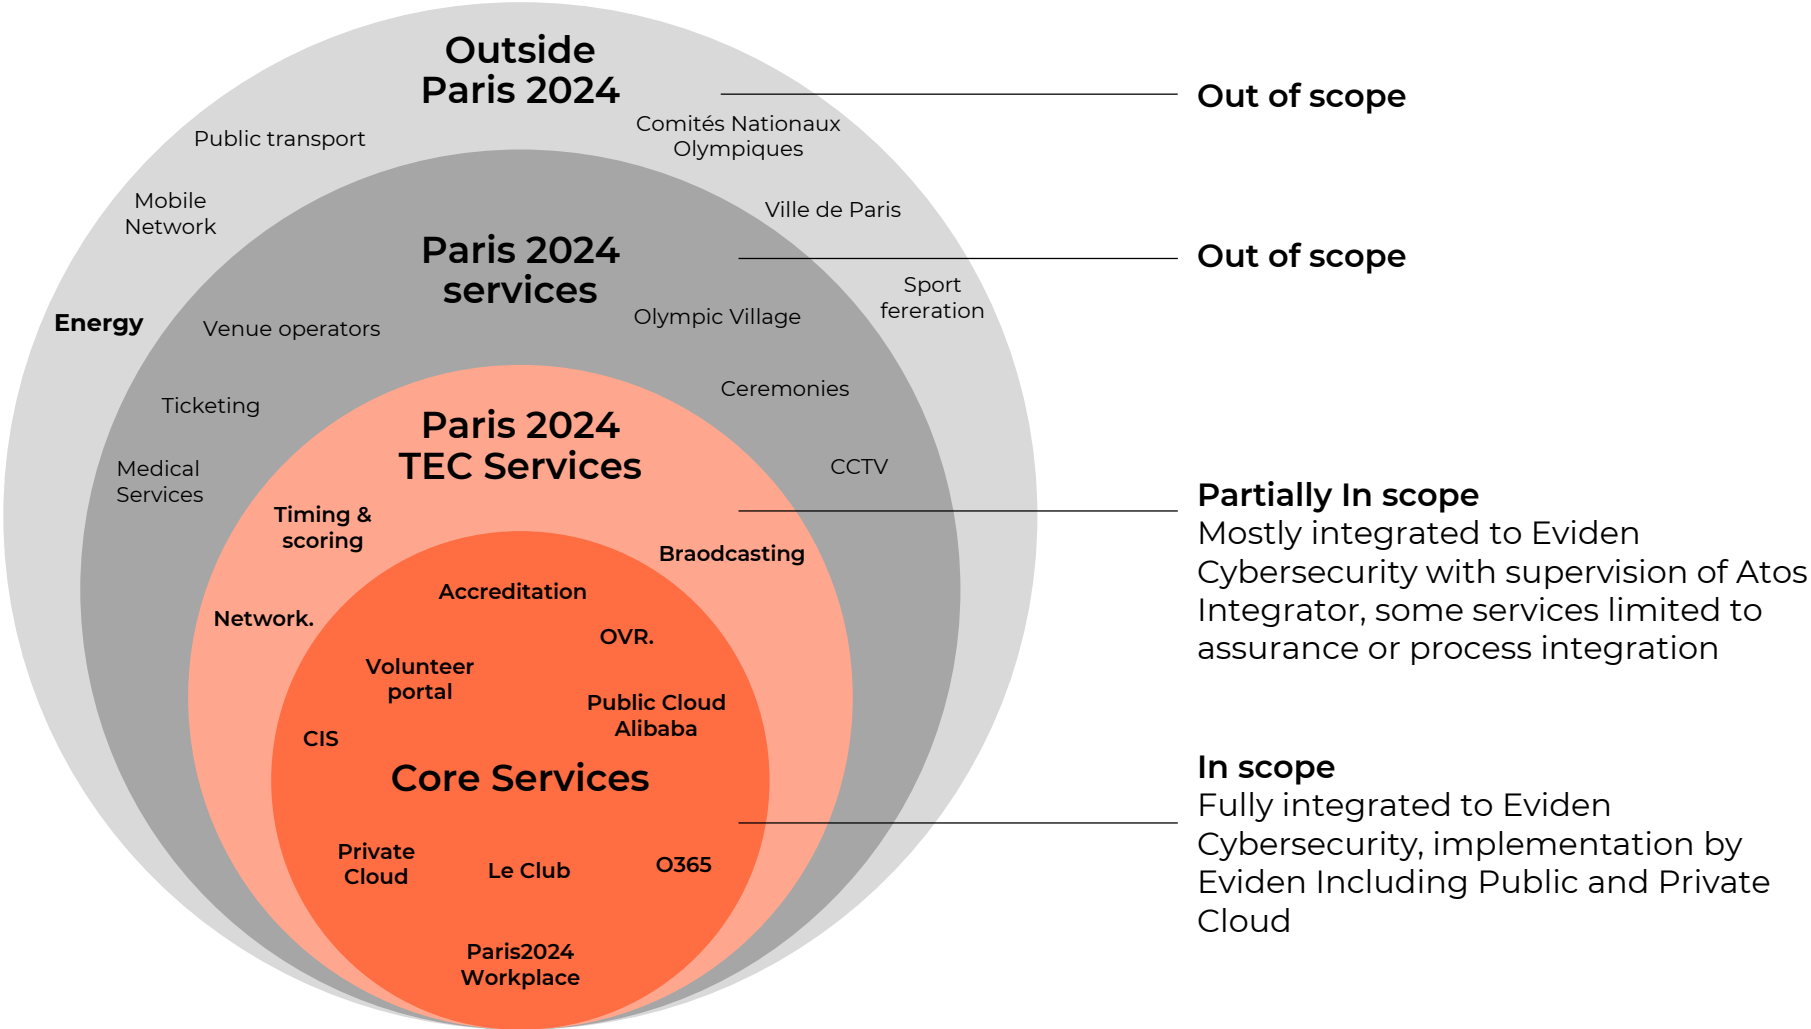

## PYEONGCHANG 2018

The "Olympic Destroyer" worm caused problems during the opening ceremony (screens disconnected in the stadium, etc.) as well as technical problems on the network (Wifi) for journalists.

# The scope of action of Paris 2024 and Eviden Cybersecurity Services

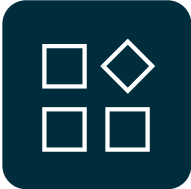

# Our challenges for Paris 2024

Build a robust Cybersecurity Solution to protect the largest event of the world

Ensuring cybersecurity for a new growing company that will be decommissioned in September 2024

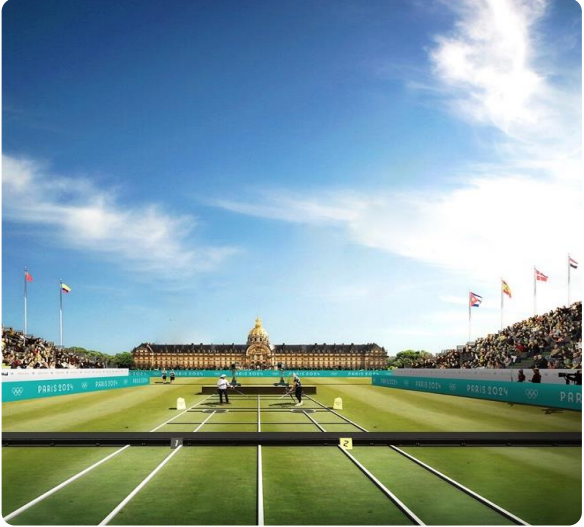

Cyber must adapt to an information system and to a constantly evolving threat

Collaborate and work with all partners, providers (Paris2024, Cisco, ANSSI, Orange, Alibaba)

Integrate all existing solutions and partners (Cisco, Atos, Alibaba, Orange network, SaaS application providers, ...) in line with the ANSSI recommendations

# Cybersecurity strategy for Paris2024

## Anticipation

- Understand the Olympics challenges
- Identify risks
- Identify threats
- Deploy solutions to respond to risks and protect against threats
- Conduct tests (Technical Rehearsal, Red Teaming, Pentest)

## Expertise

- More than 100 Cyber experts
- Within the CSOC
- 2 European sites in support
- Expertise on all solutions
- Artificial intelligence in support of Cyber analysts
- Automation of operations

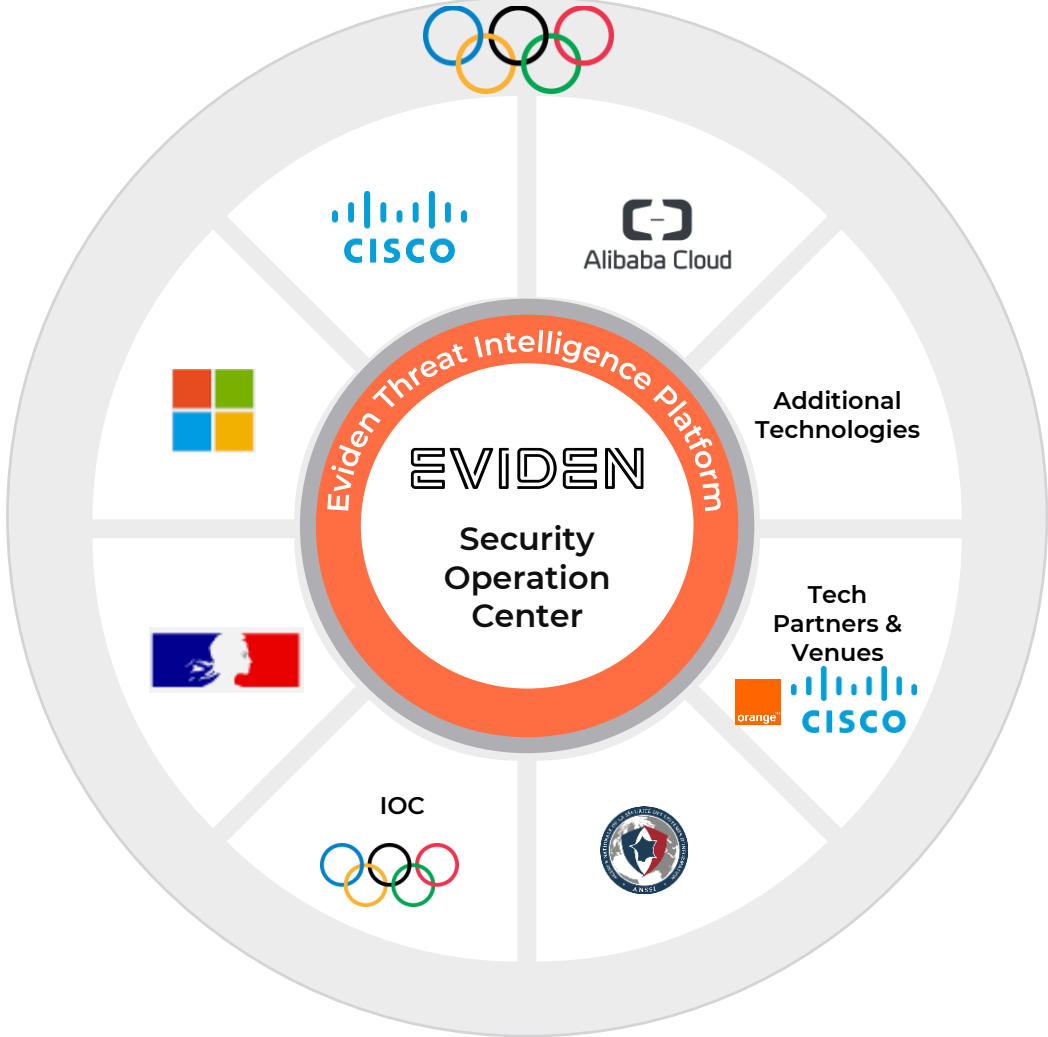

## Coordination

- Coordination with all the partners

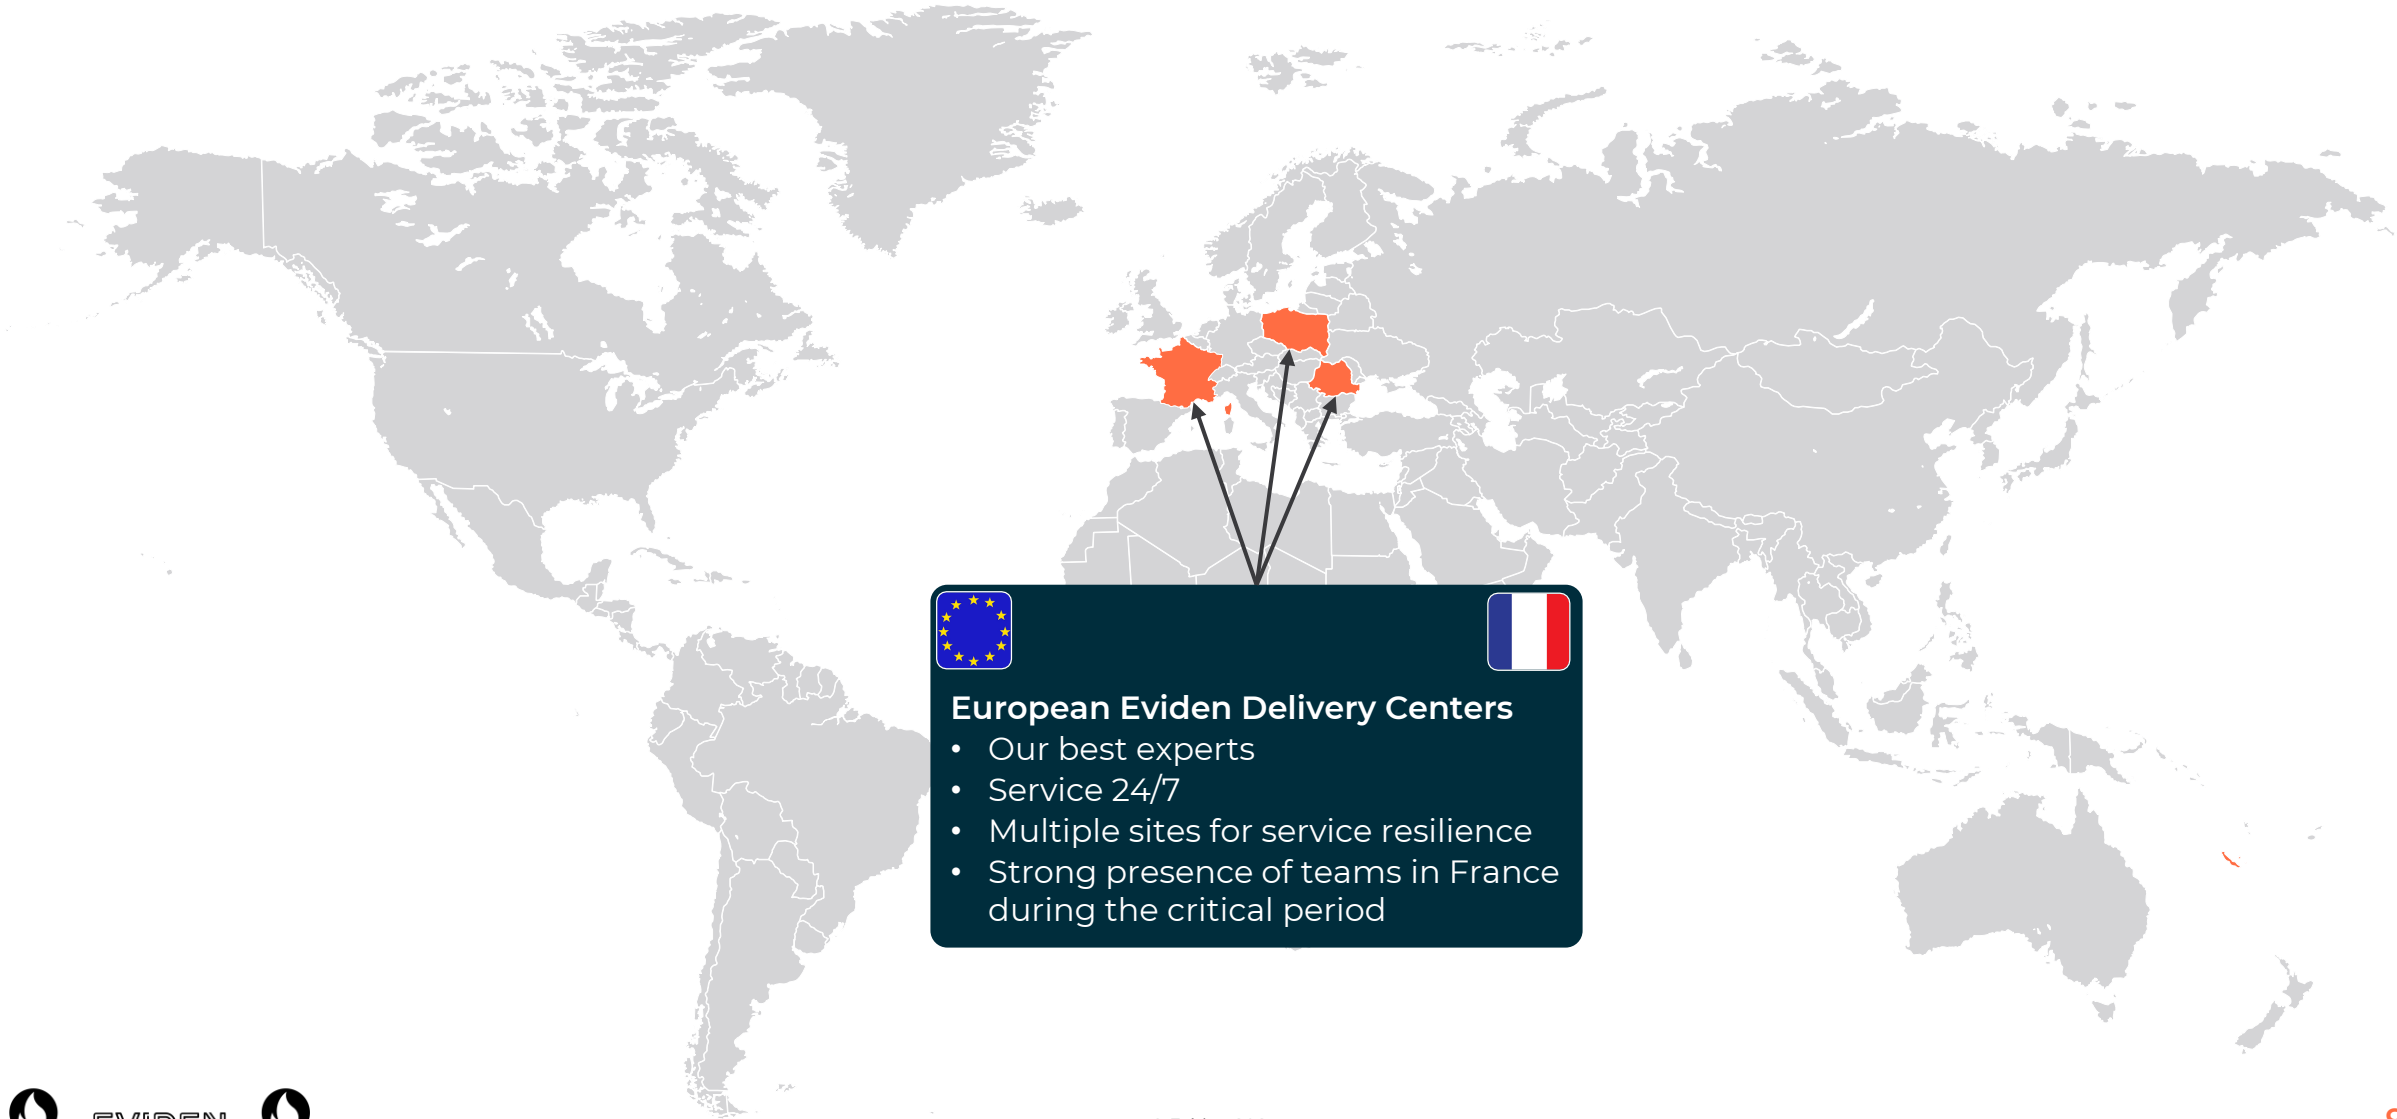

# Cybersecurity overview

- 1 Risk-based cybersecurity
- 2 Threat-centric operations and cyber surveillance
- 3 Collection of all events
- 4 Sharing Qualified Threat Intelligence
- 5 Attack Detection
- 6 Reports
- 7 Crisis Management

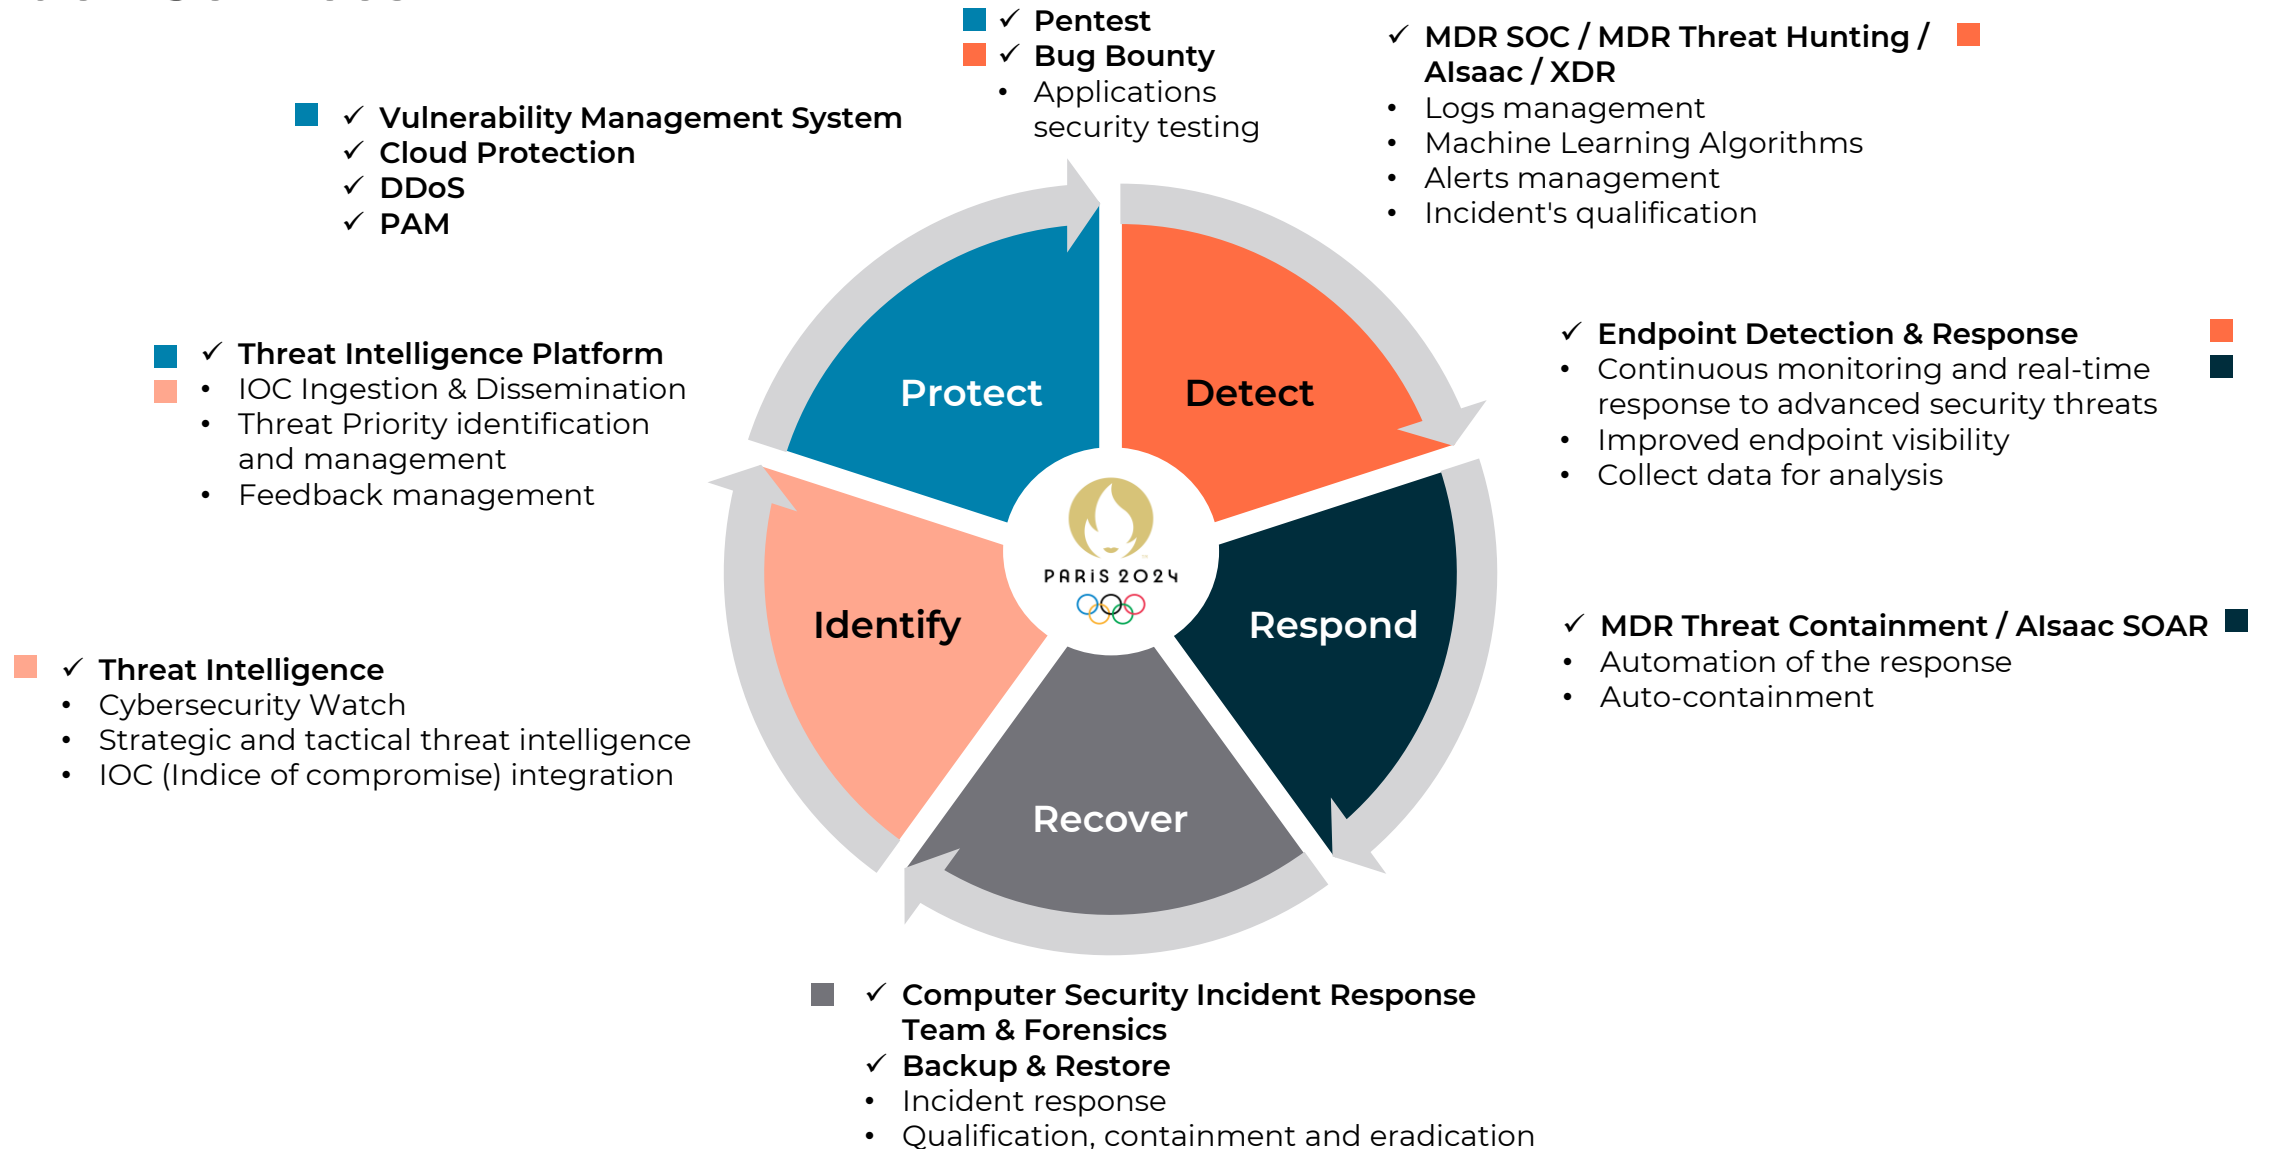

# Eviden Cybersecurity Services Localization

### European Eviden Delivery Centers

- Our best experts
- Service 24/7
- Multiple sites for service resilience
- Strong presence of teams in France during the critical period
